Where Light Meets Control

WINDOW COVERINGS

Sheer Shades

The fabric is full of innovative functional design, and has the most elegant light effect in the window fabric industry. No other window fabric can surpass it in terms of light effect. The sheer shades brings the latest trend to window fabric. Not only can the natural light be adjusted to block the radiant heat, it can also bring extraordinary outdoor scenery.

The fabric consists of horizontal braid blades suspended between two layers of vertically soft yarns, which are adjusted to open and close the horizontal blades.

The texture is light, soft and clear. It combines the advantages of roller shades and Venetian blinds to create an elegant and romantic home life.

It can effectively block 99% of UV When the blackout blades are closed,. When the blades are opened, it can filter the sunlight, soften the indoor light, and can block 65% of UV.

Where Light Meets Control

Product Characteristic

- ✧ A wide variety of designer colors and styles, from soft to bright.
- ✧ The fabric is made of high quality polyester, which does not contain harmful substances to human body.
- ✧ Unique blades design with translucent and blackout selected, suitable for elegant and romantic indoor design. The blades can be turned over to adjust the light entering the room arbitrarily, providing satisfactory privacy.
- ✧ Adopting special bonding technology, the fabric is not easy to deform; The blades are dustproof and antistatic, which is easy to clean.
- ✧ High quality and durable accessories, quiet and smooth system operation.
